

To whom it may concern;

I'm interested in speaking with you about your film composer job posting on the Film and TV Pro website.

I am a life long musician / multi-instrumentalist with over 30 years of music experience. Over the past few years I have been very involved with sample library technology and improving my education in music composition. I'm currently half finished with my Bachelors in Professional Studies in Music Composition for Film, TV, and Games at Berklee College of Music Online. I have recently completed my Master Certificate in "Orchestration for Film and TV" from Berklee, which was the precursor to my entrance into Berklees degree program. I have also completed the online Composer Course call "Music for the Media" with full certification and also a course titled "Cinematic Orchestration" were both are offered by <http://thinkspaceeducation.com>. On top of the music skills, I also worked for many years in the computer tech field and posses the necessary skills required to operate in the modern film music business today. Therefore I feel strongly that I can effectively create, produce, and deliver the music required for your project.

I feel that my music speaks for itself and I would be a good fit for you project, you can listen to my music here:
